## CONFERENCE OVERVIEW

The International Electric Propulsion Conference (IEPC) is the premier international forum for spacecraft primes, hardware developers, government researchers, academic scholars, and students in the field of electric propulsion. The IEPC is held every two years and is attended by more than 500 participants with representation from more than 25 countries.

## SPONSORSHIP OPPORTUNITY

The 2017 IEPC will have a rich and diverse technical program featuring the latest developments and research results in the field. The typical program offers more than 350 technical presentations that span from propulsion device physics and development to on-orbit operation and satellite fleet management. The Exhibit Area allows companies to showcase their latest products and R&D efforts. The program and venue provide multiple opportunities to build strong relationships with key players in the industry.
